MPP Consulting is a service orientated Consulting Engineering and Town Planning Company, equipped to handle projects over the full spectrum of civil engineering work. In line with the Broad-Based Black Economic Empowerment Charter, MPP has been established by EPS Consulting Engineers (Pty) Ltd. In the transition phase, MPP still utilises some of the facilities and personal from the two companies.

MPP specializes in the design, contract administration and quality assurance for a variety of engineering projects.

We aim to provide clients with the highest standards of professionalism and by utilising experience and the latest technology, furnished customers with innovative solutions to complex problems.

At MPP we are committed to:

- Satisfy the needs of each client and serve them with honesty and integrity.
- Active involvement in community upliftment projects and capacity building in disadvantaged communities.
- Meet the demands of society and fulfil its needs.
- Offer a competent and competitive service of exceptional quality.
- Add value to our projects through quality of service and effective designs.
- We are business orientated and strive for sustainable profitability and growth.

The company keeps in touch with the latest technology to ensure innovative, cost effective and appropriate engineering solutions. The company further serves its clients with the highest levels of integrity and impartiality. We further market through a quality product, and strive to establish long term relationships with all our clients.

MISSION

MPP Consulting strive to conceive, implement and complete projects in order to fulfil the needs of each client and the community and to supersede their expectations, by offering innovative solutions based on sound scientific principles

PROFILE

The Company currently has at its disposal a work force of three registered professionals, two technologists, two administrative personnel, and a number of specialist technologists appointed on a contract base, all with extensive experience in various field of Consulting Engineering.

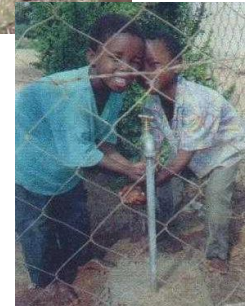

Members of MPP are – inter alia – registered with the following professional bodies to guarantee the highest standards of professionalism namely:

Engineering Council of South Africa

South African Institute of Civil Engineering

MPP Consulting is further in association with specialist Consulting Engineers in various fields of expertise ensuring better competitiveness.

Students from Universities are frequently employed to complete their practical training at MPP. They are exposed to town planning, engineering design, supervision and other consulting services within the company. They are trained and guided in all the abovementioned fields of expertise.

COMMUNITY INVOLVEMENT

MPP has through its member's extensive experience working with communities of all sizes to provide an array of specialised services such as facilitation of Community involvement. The facilitation process (community engagement process) is usually required to establish social and development compacts for targeted communities.

MPP has the ability, experience and resources to act as Community Liaison Officer that act as a go-between for the work force, contractor and Project Steering Committee to avoid possible conflict.

Profit motive is eventually the driving urge in any business venture, but at MPP we believe this could not be achieved at all costs. Therefore we often make contributions to community programmes in areas where we do business.

BLACK ECONOMIC EMPOWERMENT

The aim of affirmative action and BBBEE is to raise the quality of life of disadvantaged communities in South Africa, thus enabling them to compete on an equal footing. MPP is an equal opportunity consultancy that believes that BBBEE is a strategy to give people the opportunity to develop themselves. The company believes that true democracy can only occur when people are empowered to participate in civil society. The company complies with the Broad-Based Black Economic Empowerment Charter drafted for the Construction Sector and the Broad-Based Black Empowerment Act, Act 53 of 2003.

At MPP we believe that our competitiveness and long term success depend fundamentally on the skills and commitment of our employees. To make this possible, MPP seeks opportunities to undertake employment programs as an integral part of the projects with which it is involved. The business will therefore strive to have in place a variety of training, development and career advancement programs, which enhance the contributions, made by all its employees.

We participate in CMIP projects as Consulting Engineers but also engage in the development of people from previously disadvantaged communities.

The company further aim to get involved in community based projects structuring projects in such a way that job creation takes place by using labour based construction methods, thereby creating opportunities for the training of contractors, artisans and maintenance personnel.

SPECTRUM OF ENGINEERING SERVICES

MPP is committed to meeting the challenges of the next century by providing world class engineered solutions based on a thorough understanding of clients needs. The company aims to be judged on the level of enhancement it provides to its clients' businesses and to produce a service which is environmentally sound and beneficial to society.

MPP has provided co-ordinated services in master planning and design of water supply, storm water, waste water, traffic, transportation, structural and electrical services for projects in South Africa and neighbouring states.

The spectrum of engineering services provided by MPP Consulting is the following:

ROADS AND STORM WATER

MPP specialises in the design and construction management of new facilities as well as modifications to existing facilities to achieve economically and environmentally sound solutions to client concerns. In-house expertise is available in the areas of:

- Roads- and storm water design - rural and urban
- Pavement engineering
- Drainage engineering and systems design
- Hydrology
- Storm water management

WATER RESOURCES AND SUPPLY

A properly engineered system is essential for private developers, public water authorities and municipalities responsible for delivering an uninterrupted, consistent supply of clean water. The experience of MPP is unsurpassed in every aspect of water related engineering.

MPP is able to cost-effectively assess and respond to client needs by drawing upon our expertise for:

- ❑ Water resource studies
- ❑ Water treatment and process designs
- ❑ Reclamation and recovery
- ❑ Water reticulation
- ❑ Pipelines
- ❑ Reservoirs
- ❑ Pump stations
- ❑ Dams and canals
- ❑ Hydraulics
- ❑ Water supply and distribution systems

WASTEWATER CONTROL

An area in which MPP excels is the treatment of municipal and industrial wastewater to minimise their environmental impact and achieve compliance with regulations. Expertise is available in the areas of:

- ❑ sewage reticulation
- ❑ low cost sanitation
- ❑ pumping stations
- ❑ sewer and manhole rehabilitation.

TRAFFIC AND TRANSPORTATION

Traffic analysis and transportation engineering are two of the fastest growing client services. MPP has a substantial background of experience in the detailed investigation, design and application of all aspects of traffic engineering practice. This work extends to an involvement with projects ranging from feasibility studies and traffic impact studies through to transportation planning

MPP strive to solve transportation problems through research in transfer technology and to develop diverse human resources to meet the transportation challenges of tomorrow.

The company offers a selected range of services and fields of specialisation in traffic engineering, traffic management and transportation planning including:

- Feasibility studies
- Traffic impact studies
- Parking studies
- Transportation studies
- Public transport
- Travel demand forecasting
- Traffic engineering
- Maintenance inspections and reports
- Automated computer design and plan preparation
